INCENTIVES TO EXPLORATION. They Are Various and Not at All Confined to the Love of Discovery.

Every year the hunt for the precious metals and the shining stones grows sharper, until the plateau of Thibet and the further isles of the eastern archipelago are almost the only likely places where the agents of Euthe different young people's societies ropean firms are not inquiring, and of Christian Endeavor held at the First prospecting, and sending home concrete evidences that, if enough is spent and a sufficient area of unknown territory is diligently examined, there may be solid returns. The emerald seekers of Ecuador know the paths of its mountains better than geographers, says the Spectator, and the hunters for gold will make known every ravine of the vast region between Cape Colony and Lake Nyassa.

Every year the demand for wood drives importers into more distant forests, while the enthusiasts of botany and ornithology are ransacking regions into which it was recently supposed to be death to enter. The Phoenicians of our day number whole tribes, and they are penetrating everywhere, exactly like their old prototypes, in search of spoil. Nothing stops the explorers for gain, and another party will follow them yet, not longing for minerals or new drugs, but for great estates. Australia was not explored for explora-tion's sake, but to find lands fit to support great herds; and so will Africa be, and the eastern archipelago. The competition for great fortunes grows bitterly sharp, and this is a road on which adventurers need only daring, a certain caracity for command, and a resolve to explore such as was displayed in New South Wales by the Wentworths, who, twice beaten by the mountains, went on a third time, to become great nobles in the southern world.

SOUND OF A SUNBEAM.

No. 11, from the south was delayed Even the Rays of Light Have a Way of Making Themselves Heard.

One of the most wonderful discoveries Mrs. Walter C. Eush and daughter in science that has been made within the last year or two, says the Yankee the city, visiting Mrs. Fred S. Clark Blade, is the fact that a beam of light produces sound. A beam of sunlight is thrown through a lens on a glass vessel that contains lampblack, colored silk or worsted, or other substances. A disc having slits or openings cut in it is made to revolve swiftly in this beam of light so us to cut it up, thus making alternate flashes of light and shadow.

On putting the ear to the glass vessel strange sounds are heard so long as the flashing beam is falling on the vessel. Recently a more wenderful discovery has been made. A beam of sunlight is caused to pass through a prism, so as to produce what is called the solar specrum or rainbow. The disc is turned, and the colored light of the rainbow is made to break through it.

Now place the ear to the vessel containing the silk, wool, or other material. As the colored lights of the spectrum fall upon it, sounds will be given by different parts of the spectrum, and there will be silence in other parts.

For instance, if the vessel contains red worsted, and the green light flashes upon it, loud sounds will be given. Only feeble sounds will be heard if the red and blue parts of the rainbow fail upon the vessel, and other colors make no sound at all. Green slik gives sound best in a red light.

Every kind of material gives more or less sound in different colors, and utters tion. no sound in others.

SALT AND WATER.

A Young Man Pays Dearly for His Ignorsince of the Latin Tongue.

A little knowledge is more often a useful than a dangerous thing, and a young man who knows "small Latin and less Greek" discovered the fact not long ago. The Saturday Gazette tells the

DEAD AND DO SOME THINKING

The voter cannot cast an intelligent Ballot unless he can appreciate the intricate manipulations of the wheels of government and become conversant to some extent at least with the fundamental facts and theories controlling the various great governmental departments, and he cannot hope to know the character of the chief executive unless he reads an Accurate and Impartial Biography, written and compiled by a Master Litterateur, equal to the difficult task.

Gen. Benjamin Harrison is a candidate for re-election. The Nation demands that the hero who led its armies in the Field, and who for four years has wisely and nobly steered the ship of state shall continue to hold the helm and guide our Nation through the perils of the future as ably as he has through those of the past. He who during the administration has saved the country from a series of threatening dangers, has brought Italy AMERICAN FAMILY SOAP, and Chile to the feet of our Republican throne, and Best for General Household Use. made even England yield to American demands in the Behring Sea difficulty, is the man for the people of these

United States. Gen. Lew Wallace, who is known throughout the United States as one of the most intimate personal friends of President Harrison, and as having had a great deal to do with his re-nomination, has written a biography of the President, which reads like a veritable

Romace, yet is Accurate History. The book has been officially authorized and contributed to by the heads of the government in Articles regarding the workings of the Republican policy and the Present administration. These distinguished contributors include Hon, William E. Curtis, Hon, John Wanamaker, Hon. Jeremiah Rusk, Secretary Foster and Hon. Eugene Hale. Their topics include commercial Reciprocity, Postal Service, Progress of the

Public Domain, Etc. When General Harrison was asked his choice of a biographer he promptly replied, "My life-long friend, General Wallace." His chief advisors, interpreting the President's desire, have officially supplied the volume with most valuable contributions.

The Book is a Monument to Skill and Fidelity.

We offer it Free with three months' subcription to THE HERALD. The book sells for \$1.50, and thousands of copies have been and are being sold. We are desirous of having such a book, brim full as it is of information of vital importance to the voter, in every home in Western Michigan. It will be referred to oftener than a dictionary, and will be read with more pleasure than a novel.

Send \$1.50, the subcription price of "THE HERALD" and we will send you at once
